

INTERDISCIPLINARY PROGRAMS

Our 2025 recap demonstrates how IPE advanced OU's 'Lead On' pillars, from student success to improved health for Oklahoma.

5,923

Empowering students for a life of success, meaning, and impact, our student registrations in IPE curriculum activities reached their highest levels ever in CY25, increasing by almost 18% from CY24!

Lifting the Health of Oklahoma

882

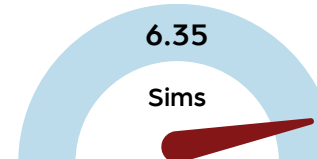

Hours of team-based clinical service provided to the community, addressing areas including primary care, diabetes, speech and hearing, behavioral health, and neurology.

1,000+

Number of patients seen by Unity Clinic teams, addressing access to care for Oklahoma's most underserved communities.

OUTCOMES: Empowering Teams for Success

Using the Jefferson Team Observation Guide (JTOG), questions coded to the IPEC Core Competencies are aggregated and averaged. Based on a 7-point Likert scale, 7=Exceptional. Our teams are reporting high functionality and preparation for collaborative success.

“It was a really good simulation! It taught a lot about the importance of communication and putting your patients first.”

“Interprofessional education prepares us for the type of collaborative work that increases health outcomes and reduces cost.”

Ascend as ONE OU

Our 21 IPE Educator Certificate participants engaged in meaningful project development, including collaborative work with the Latino Community Development Agency to improve diabetes outreach, and the launch of the new 'Working with Midwives' simulation to improve collaborative care.

Thank You

Your IPE team – Raina, Vanessa, & Margaret – thanks our campus collaborators for a successful 2025!

Leading IPE Research

- The Wisdom Family Foundation Seed Grants are sparking innovation! Projects are underway involving AI, Unity Clinic at Keys Speech & Hearing, Dementia Care, and more.
- The 2025 Poster Hall highlighted the work of 41 student teams showcasing where research translates to practice.
